### Calendar April

**6 Glider**  
**13 Open Day**  
**14 Indoor flying @ Arena 7:30pm**  
**20 Vintage**  
**24 Club night**

### **Glider Report** **2-metre Competition**

Sunday March 9<sup>th</sup> turned out rather windy, 10-12 kts with gusts to 15 kts, but four fliers arrived with their gliders, keen to test the conditions. After a hair-raising first round we decided to head for the Clubhouse and a cup of tea/coffee, and there we stayed, vowing to bring lumps of lead next time to aid glider penetration.

Results (3-min target):

Anthony	3.20/-	160pts
Geoff	2.19/-	139 pts
Merv	1.45/-	105 pts
Peter	1.06/-	66 pts

No-one managed a spot landing.

Safety measures have been implemented as a result of last month's accident. Day-glo tapes have been attached to the bungee to make it more visible, as suggested by Russ, and a starting 'hooter' is to be purchased.

Just a reminder about the 2-metre rules....

Maximum wingspan is two metres (79") and just two servos, usually rudder & elevator. In Club contests we are flexible and you won't get turned away if your model is larger than two metres. Also, you can have flaps, spoilers or whatever, but you won't get landing points if you use them.

Happy gliding.  
Merv

And I thought Modelers built strange aircraft
